

**Annex III (to section 1 subsection 1)
marketable and prescribable narcotic drugs**

(The original text has been published in the Federal Law Gazette (*Bundesgesetzblatt* - BGBl.) I 2001, 1189 – 1195)

- Column 1 contains the International Nonproprietary Names (INN) of the World Health Organisation. In naming a substance, the INN has priority over all other names.
- Column 2 contains other non-protected names of substances (short or trivial names). If there is no INN for a substance, the name printed in bold in this column may be used to name the substance unambiguously. All other names not printed in bold are not unambiguous in scientific terms. For this reason, they have to be used together with the name in column 3.
- Column 3 contains the chemical names of substances pursuant to the nomenclature of the International Union of Pure and Applied Chemistry (IUPAC). If no name is listed in column 1 or 2, the name listed in column 3 is to be used.
