Patient Safety and Start-ups: Who is responsible?

1. The Developer

2. The Computer

Copyright ©2013 R.J. Romero.

EMR System prompt: "You caused an error that we never thought of. Click any key and see what happens."

3. The Patient

4. The Doctor

Patient Safety and Start-ups: The Recipe for Success

1. The Developer

3. The Patient

A systems approach

Awareness
Technology
Skills / Literacy
Transparency
Regulations and Clearness

Culture counts

Patients as true partners

Reliable information
Digital Health Literacy

**Test, Create Evidence and
Decide!**

4. The Doctor

Patient Safety and Start-ups and IT: Let´s just do it!

*Oh my grandson, once upon a time...
I have to tell you something you will not
believe:
doctors perscribed drugs without using a
computer in 2017...!*

Stop telling me stupid things, grandpa!

What can start-ups and developers do and what do they need to improve patient safety?
