

WHO Action for Global Patient Safety Challenge

Medication Without Harm

Dr Neelam Dhingra
Coordinator
Patient Safety and Quality Improvement
WHO-headquarters, Geneva

Goal of the Challenge

Reduce the level of severe,
avoidable harm related to
medications by 50% over 5 years,
globally

Overview of WHO Action

- Global leadership, policies and strategies
- Collaboration and partnerships
- Standards, guidelines and tools
- Capacity building and technical support
- Measurement of trends and progress

Overview of WHO Action

- Global leadership, policies and strategies
- Collaboration and partnerships
- Standards, guidelines and tools
- Capacity building and technical support
- Measurement of trends and progress

Global leadership, policies and strategies

- Provide **global advocacy** to Member States and partners to implement the Challenge
- Develop a detailed **strategic plan and framework for action** to implement the Global Challenge
- Lead the **process of change** and take global action to make progress on the domains of the Challenge framework – role of working groups (*Patients and the public; Health care professionals; Medicines; Systems and practices*)

Global leadership, policies and strategies

- **Coordinate** the implementation of plan and activities of the Challenge
- Mobilize **resources** to enable its full and successful implementation
- Publish a **strategy** setting out **research priorities** and **promote/support research** on medication safety as part of patient safety research

Medication Without Harm

Create and implement

- **Communications** and advocacy strategy
- Global **campaign**
 - Awareness and engagement of patients, communities, policy makers
 - Produce and disseminate promotional/educational materials
- After global launch, follow-through through **regional launch events** in

Overview of WHO Action

- Global leadership, policies and strategies
- Collaboration and partnerships
- Standards, guidelines and tools
- Capacity building and technical support
- Measurement of trends and progress

Collaborations and Partnerships

- WHO will collaborate with **partners**, for action at all levels, to implement the Challenge
- Work with **key institutions and** WHO CC
- Create a **network** of international medical / nursing/ pharmacy **professional societies**
- Continue engaging with **regulatory agencies and international actors** and continuously improve medication safety through improved packaging and labelling

Overview of WHO Action

- Global leadership, policies and strategies
- Collaboration and partnerships
- Standards, guidelines and tools
- Capacity building and technical support
- Measurement of trends and progress

Standards, guidelines and tools

- Commission **expert reports** to provide a starting point for in-country work to develop guidance and action plans in each of the domains of the Challenge
- Develop strategies, **guidelines and tools** to assist implementation of the Challenge by countries
 - Develop tools/technology to help patients protect themselves from harm

Medication Safety Curriculum

- WHO Multi-professional Patient Safety Curriculum Guide
 - Update and implement Medication Safety Curriculum for training of undergraduate and postgraduate medical /nursing / pharmacy students

Safer Primary Care

Reduce medication errors in primary care settings

Medication Safety Standards

WHO Eastern-Mediterranean Region

Patient safety assessment manual Second edition

WHO checklist
Surgical site infections
Safe medication
Correct patient identification
Outcome
Safety workshops
Learning culture
Process
Improvement
Patient Safety Friendly Hospital Initiative
Reporting system
Safe surgery
Hospital acquired infections
Falls prevention
Medical error
High alert medication
Assessment
Indicators

Patient safety tool kit

Medication Error Reporting and Learning Systems

- Effective solution to reduce avoidable medication-related harm – by developing systems for RLS

Patient Safety Incident Reporting and Learning Systems

Implementation Guidelines

2017

The ten data categories of the
Extended Minimal Information
Model for Patient Safety are:

1. Patient information
2. Incident time
3. Incident location
4. Cause(s)
5. Aggravating Factor(s)
6. Mitigating Factor(s)
7. Incident type
8. Incident outcomes
9. Resulting actions
10. Reporter's role

World Health
Organization

Overview of WHO Action

- Global leadership, policies and strategies
- Collaboration and partnerships
- Standards, guidelines and tools
- Capacity building and technical support
- Measurement of trends and progress

Capacity building and technical support

- Facilitate the development and implementation of **country programmes**, including national medication safety plans
- Advocate for designation of **national coordinator** for the Challenge
- Strengthen human resource capacity – **better provider–patient interaction**
- Work with countries for **early priority action**:
 - High–risk situations
 - Polypharmacy
 - Transitions of care

Overview of WHO Action

- Global leadership, policies and strategies
- Collaboration and partnerships
- Standards, guidelines and tools
- Capacity building and technical support
- Measurement of trends and progress

Measurement of trends and progress

- Monitor and evaluate **impact** of the Challenge
- Strengthen the quality of monitoring data
- WHO working group on Monitoring and Evaluation
 - Identify and define the key **terms** and **concepts**
 - Assess burden of unsafe medication practices
 - Review evidence, experience, and best practices in monitoring and evaluating medication safety
 - Develop a **framework for measuring**

Medication Without Harm

**The Third Global Patient Safety
Challenge**

Thank you
